

THAT'S RIGHT...

The natural aging process can diminish collagen,
which can lead to:

- skin that is not as firm
- skin that is not as elastic
- a loss of muscle tone
- a loss of internal and external confidence

ThermiVa can regenerate collagen in
those smaller, secluded areas
and help you reclaim what's yours.

THERMiVa[®]
Women's Wellness

Regenerate your
confidence and excitement.

Find out

WHAT?!?

everyone is talking about

“ After having 3 kids and aging...
oh, there's definitely
a big difference and it's beautiful. ”
—ThermiVa patient

It's time to reclaim what's yours. To learn
more, talk to your health care provider or

More than 115,000 ThermiVa[®]
treatments performed worldwide.

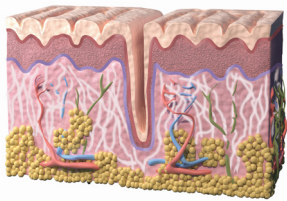

ThermiVa works HOW?!?

ThermiVa is a quick, non-invasive, non-ablative Women's Wellness treatment that uses radiofrequency (RF) energy to gently heat tissue in your smaller, secluded areas.

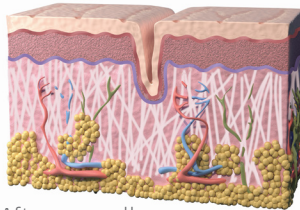

The RF energy stimulates and regenerates your body's own collagen...without using surgery, anesthesia, or hormones.

Thoughtfully designed ThermiVa single-use hand piece.

Aging Skin

After new collagen is formed

It's time to regenerate your confidence and excitement! To learn more, talk to your health care provider.

I can expect WHAT?!? from a ThermiVa treatment?

- Warm energy is applied to gently deliver heat to your secluded area, at your comfort level.
- The RF energy stimulates and regenerates collagen.
- No vapors or smoke.
- No anesthesia or numbing cream.
- Each treatment takes on average, 30 minutes.
- 3 in-office treatment sessions are recommended.
- Results can last up to 12 months.

WHY?!? should I choose ThermiVa?

Surgery, lasers, and hormones may not be for everyone. ThermiVa offers:

No downtime.

Most women may resume all normal and daily activities immediately.

Minimal side effects.

ThermiVa treatments use patented technology that is proven safe.

Real-time results.

Many women feel and see differences right away.
